

EDES 301

Trach Hero Proposal

10/05/2025
Meghan Paral

Background Information

Tracheostomy

Problem

Lack of accessible, affordable at-home training tools for caregivers of children with tracheostomies

Goal

Create a low-cost, "gamified" system to train caregivers in critical tracheostomy care skills, such as suctioning and tube changes.

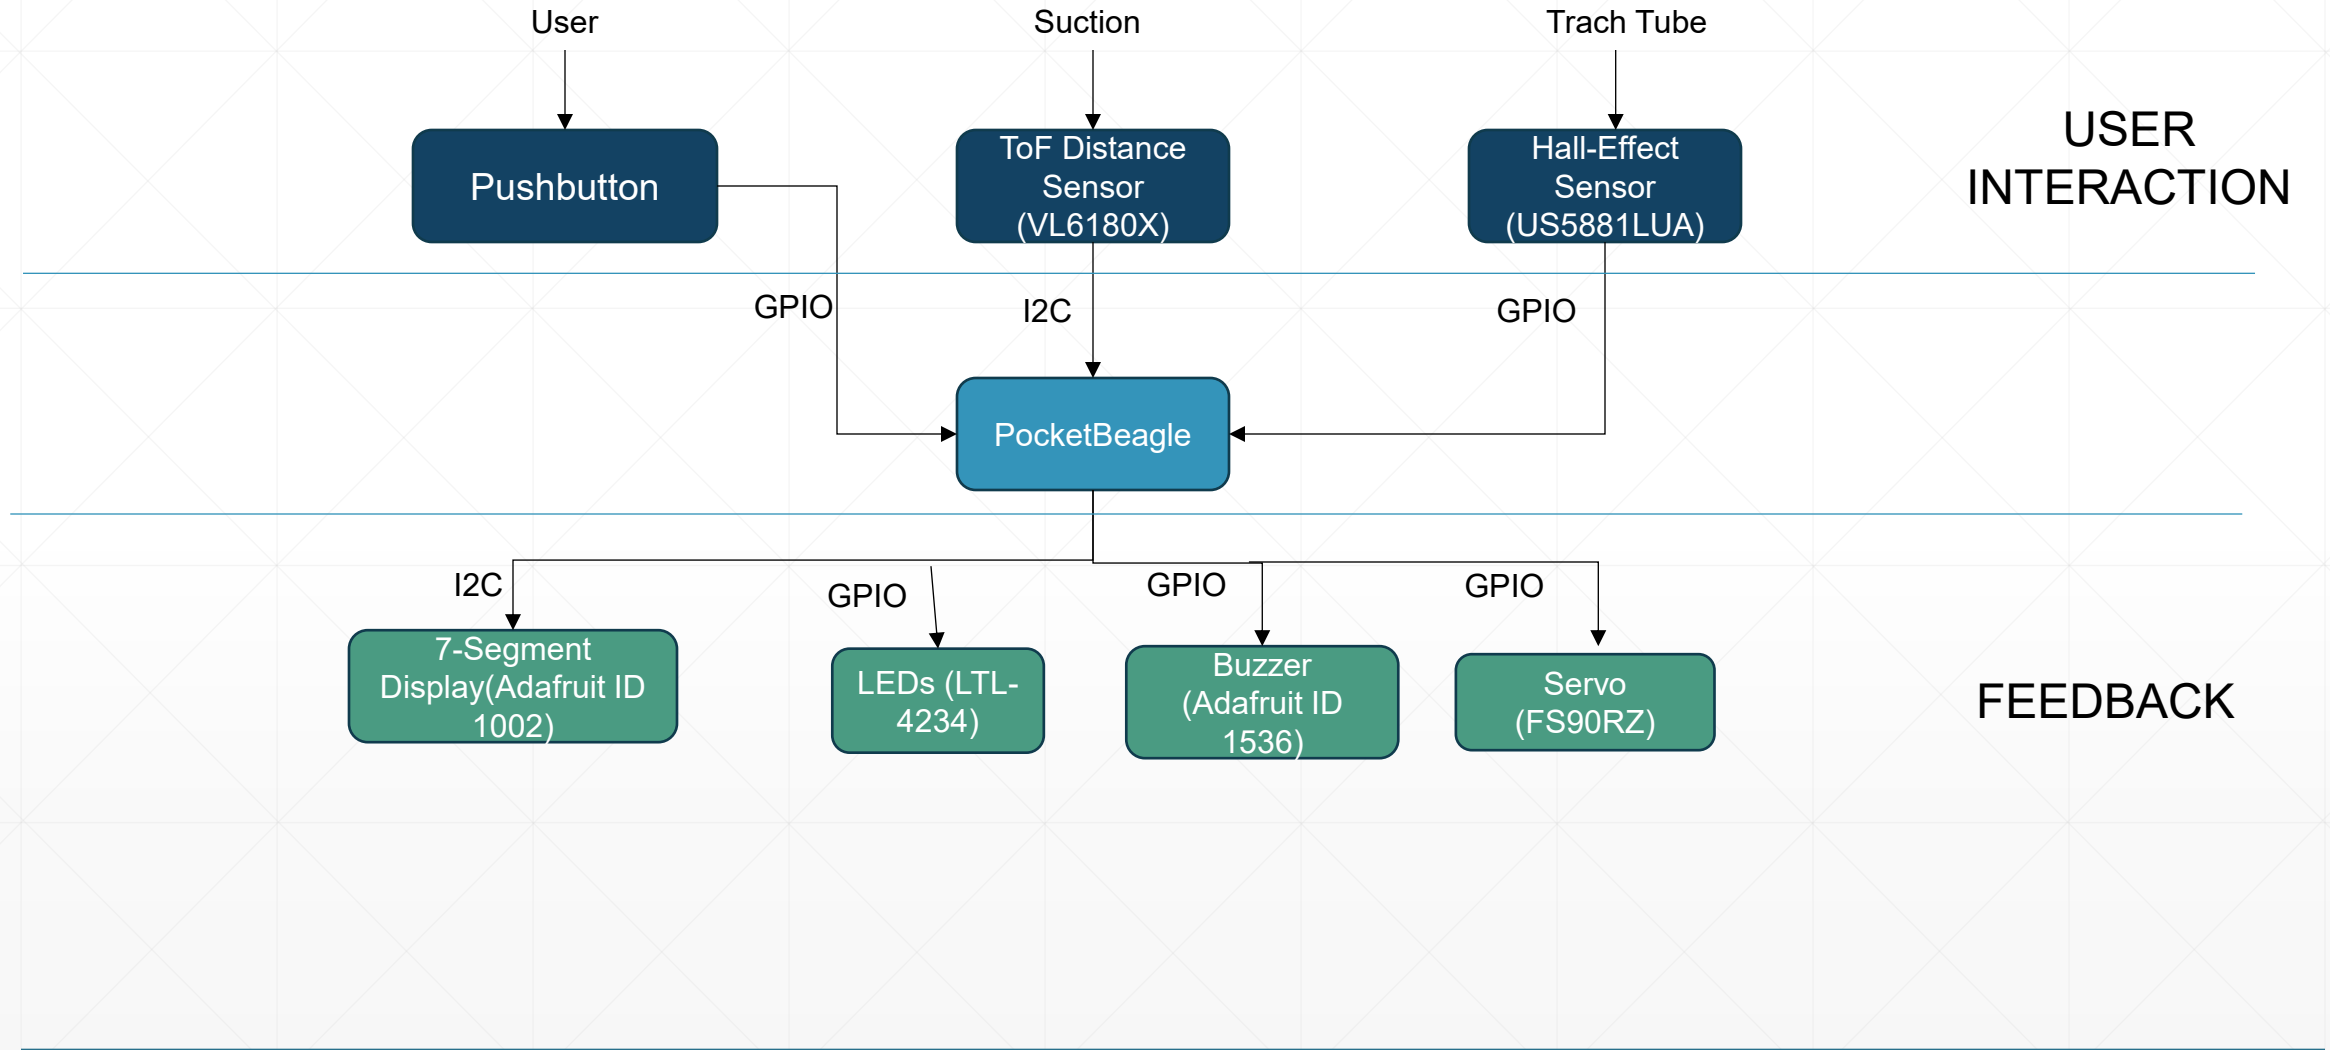

System

Sensors and real-time feedback with LEDs, acoustic, and haptic feedback

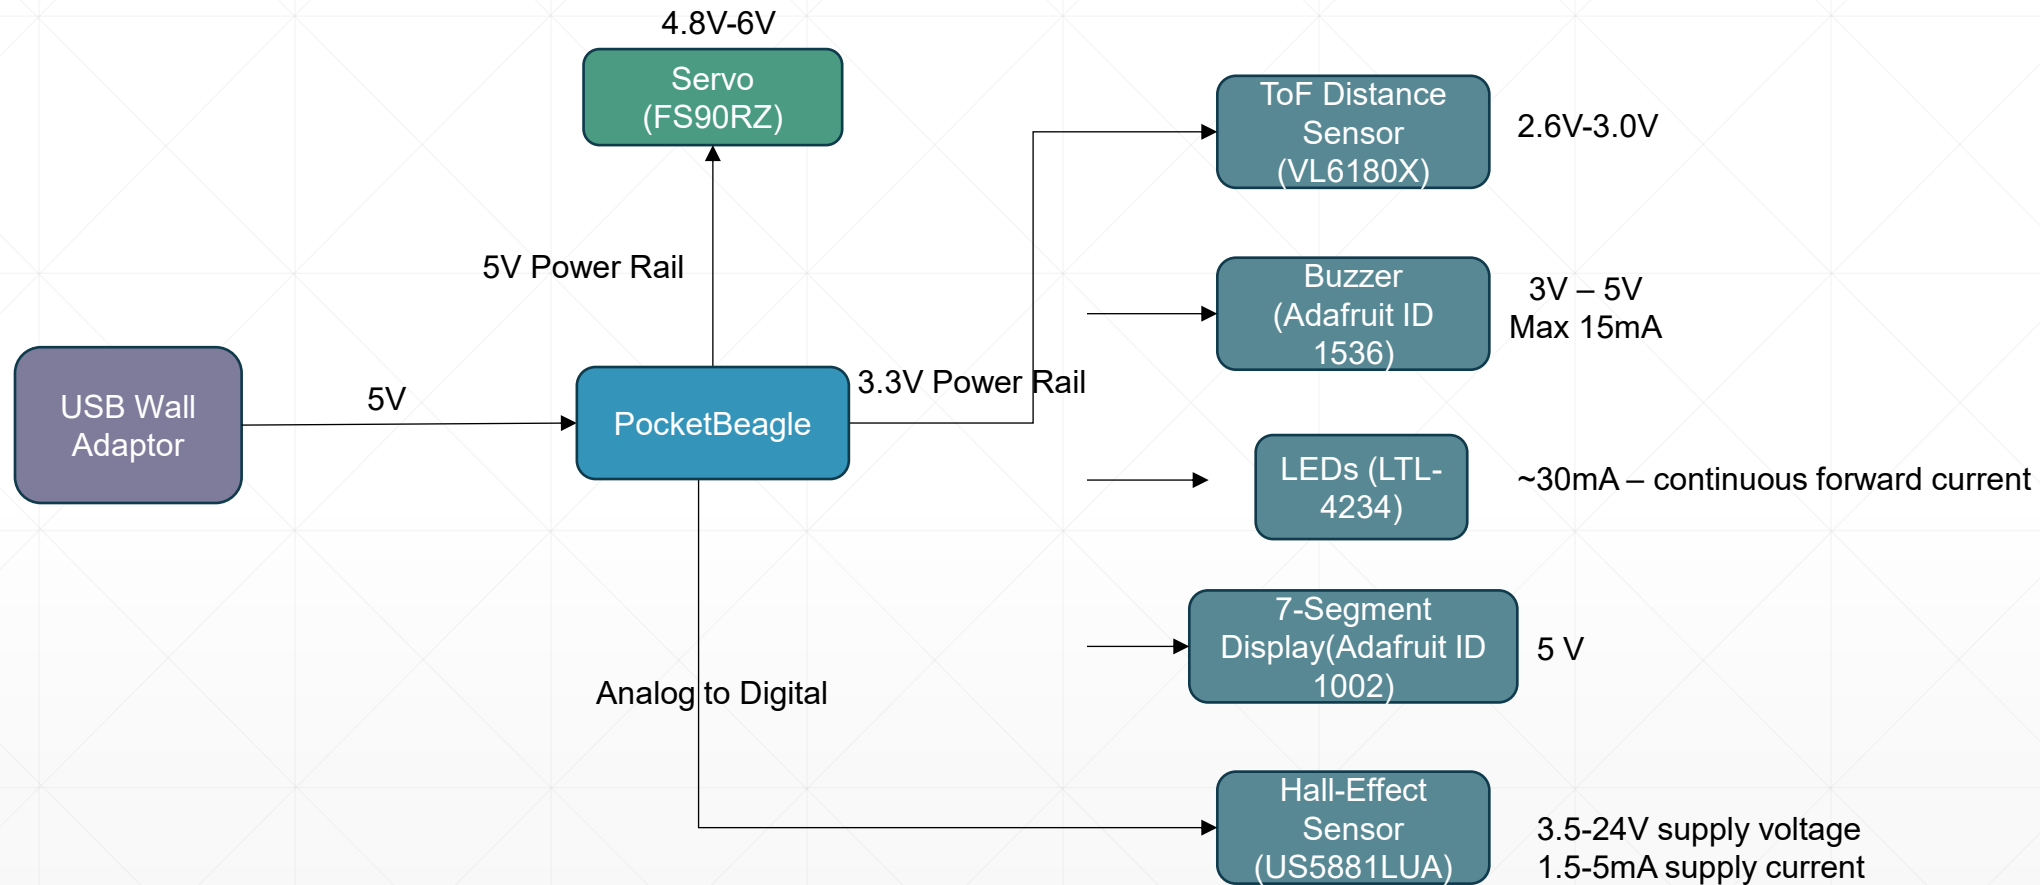

No existing projects I have found with a similar premise – here are some useful hacker pages though:
